Manvendra Sethi

Backend Development Engineer — Go · Flutter · Next.js · AWS · Docker

Bangalore, Karnataka · +91 7088708949 · manvendrasethi20@gmail.com · LinkedIn · GitHub · Portfolio

Summary

Software engineer building and deploying practical web and mobile products — Go and Flutter at work, Next.js/Python on side projects, and AWS/Docker for production. Currently a Backend Developer Intern at VALANTECH, working on the Suljhaoo consumer app, and a full-stack engineer on Maansik, a team-built mental-wellness support platform. Comfortable across application code, reverse proxies, TLS, and cloud networking.

Experience

Backend Developer Intern — VALANTECH *Oct 2026 – Present*

Remote

- Building the Suljhaoo consumer app (Flutter) for kirana stores and MSMEs, working across the mobile client and related Golang services.
- Contributing features in an offline-first product context — syncing, delivery workflow, and day-to-day engineering with the VALANTECH team.

Projects

Maansik *Sep 2026 – Present*

Go · chi · Next.js · React · Typescript · Supabase · Bazel · CI/CD

- Co-building the full stack with the team: Go 1.26 backend (chi, Uber Fx, zap, pgx, Bazel) on Supabase Postgres with RLS, and a Next.js 15 / React 19 / TypeScript frontend.
- Privacy-first data handling: AES-256-GCM thought records, pseudonymous aliases, auth BFF (OTP, signup, Google OAuth via Supabase); config via AWS SSM Parameter Store.
- Safety core: keyword policy, country-aware urgent-help API (Tele-MANAS 14416 / 112), copy-lint for non-clinical wording; check-ins, tool sessions, journal, worry parking; Docker (GHCR) + CI/CD toward EC2.

Spend Shelf — Expense Analytics *Mar 2026 -– Aug 2026*

Django · PostgreSQL · Docker Compose · Nginx · AWS EC2

- Expense tracker with auth, analytics dashboards, recurring transactions, and CSV import/export — multi-container stack on a single EC2 instance.
- Hand-configured reverse proxy, security groups, Elastic IP, and Let's Encrypt HTTPS; diagnosed Gunicorn bind and Nginx stale-DNS 502 production issues.

CodeScan — AI Handwritten Code IDE *Aug 2026 – Present*

Python · FastAPI · Gemini · Pillow · NumPy · GitHub

- Reads handwritten code from photo/camera via a provider-swappable Gemini vision pipeline; scoring engine disambiguates 0/O and 1/l/I using context.
- Detects language across 9 options and extracts dependencies; multi-stage pipeline with pytest coverage on core modules.

Trip Canvas — Travel Planning *Sep 2025 – Apr 2026*

Django · Maps & Weather APIs · SQLite · GitHub

- Destination mapping, weather, packing checklists, and budget-aware itineraries with an AI planner plus deterministic fallback when the model is unavailable.

Skills

- **Languages:** Go · Dart/Flutter · TypeScript · Python · SQL · JavaScript · R
- **Frontend / Mobile:** Flutter · Next.js · React · HTML/CSS
- **Backend:** chi · Django · FastAPI · REST APIs · Supabase Auth
- **Data:** PostgreSQL · Supabase (RLS) · SQLite · pgx · Pandas · NumPy · Matplotlib · Seaborn
- **Cloud / DevOps:** AWS (EC2, S3, CloudFront, IAM, SSM) · Docker · Docker Compose · GHCR · Nginx · Gunicorn · TLS/Let's Encrypt · CI/CD · Bazel · Linux

Education

CHRIST (Deemed to be University), Bangalore — B.Sc. CMS (CS, Mathematics & Statistics) Aug 2021 – May 2024

Don Bosco Senior Secondary School, Pithoragarh, Uttarakhand 2020

Certifications

Architecting Solutions on AWS · Building Data Lakes on AWS · AWS Cloud Technical Essentials · AI Agents Fundamentals (Hugging Face) · Complete Python Developer (Udemy)
